PROFESSIONAL SUMMARY

Full-stack Software Developer with hands-on experience building, maintaining, and debugging responsive, scalable web applications across hospitality, healthcare, education, and gaming domains. Skilled in developing REST APIs, backend integration, and relational/cloud database management (PostgreSQL, Supabase), delivering end-to-end features from data layer through to user interface. Comfortable leveraging AI-assisted development tools, including Claude Code, to speed up debugging, code review, and feature delivery while maintaining code quality. Experienced working in remote, distributed teams using Git/GitHub workflows and Agile practices, with a strong focus on reliable, production-ready software and continuous improvement.

TECHNICAL SKILLS

Languages & Frameworks: JavaScript, TypeScript, React, Next.js, Python, REST APIs, Ruby, Dart

Databases & Backend Integration: PostgreSQL, Supabase, RESTful API & backend integration

AI & Development Tools: Claude Code, Git, GitHub, VS Code

Mobile (Learning): Flutter (basic), React Native

SOFT SKILLS

- Remote Collaboration & Communication
- Problem Solving & Debugging
- Product Thinking & User-Centric Design
- Adaptability in Distributed Teams

WORK EXPERIENCE

Software Development Intern

2024 – Present

Outsource Global Technologies Ltd (Qwasar Programme)

- Contributed to real-world software development tasks within a structured, remote-style engineering environment
- Collaborated with developers using Git/GitHub workflows and Agile methodologies
- Debugged and resolved issues across hands-on coding challenges, strengthening problem-solving and code-quality practices
- Built practical, production-style projects, applying async communication and modern development workflows

Hardware/Software Repair Intern

2018

Microchips System Limited

- Diagnosed and resolved hardware and software issues across a range of computer systems
- Delivered technical support and troubleshooting assistance to end users
- Built a strong foundation in system operations and debugging

PROJECTS

Bailout — Sole Developer 2026

Digital financial-access platform connecting Nigerian MSMEs with loans, grants & advisory resources

- Designed and built the responsive frontend and product website end-to-end as sole developer, from architecture through UI implementation
- Built an interactive three-step loan/grant application flow capturing personal, business, and financial information
- Developed product sections and feature areas covering funding-match, grant discovery, credit-risk, secure disbursement, and market-intelligence concepts, plus multilingual support (English, Yoruba, Hausa, Igbo, Nigerian Pidgin)
- Integrated a Supabase Edge Function for multilingual welcome audio, with a browser speech-synthesis fallback

Tech: React 18, TypeScript, Vite, Tailwind CSS, shadcn/ui, TanStack React Query, Supabase Edge Functions

Harzock Hotel PMS — Full-Stack Developer

2026

Hotel management system for bookings, food ordering, and operations

- Built end-to-end features across frontend and backend for a hotel platform covering bookings, food & beverage ordering, and daily operations
- Developed online food-ordering and booking workflows alongside operational dashboards for staff and admin use
- Structured hotel inventory and menu data for integration into the platform's database, supporting real-time inventory and order tracking
- Integrated REST APIs and database systems to power real-time functionality across guest, staff, and admin interfaces

Tech: React, TypeScript, REST APIs, PostgreSQL/Database systems

HealthChain — Frontend Developer / Collaborator

2025

Emergency medical records platform

- Co-developed responsive, accessible frontend interfaces for a critical-use emergency medical records platform
- Integrated with Supabase backend services to display and manage patient data reliably
- Improved usability and accessibility of patient-data workflows for time-sensitive scenarios
- Contributed to UX decisions supporting fast, accurate access to records

Tech: React, Next.js, TypeScript, Supabase

NexaEdu LMS — Frontend Developer

2025

Learning Management System for NOUN students

- Built responsive UI features to improve the student learning experience across the platform
- Enhanced navigation and user flows to streamline access to course content
- Applied accessibility and usability best practices throughout development

Tech: React, TypeScript

ThesisPen AI — Frontend Collaborator

2024

AI-powered academic writing platform

- Developed and refined user-facing components for an AI-powered academic writing platform
- Collaborated with the team to deliver a clean, intuitive, and consistent UI
- Improved overall usability across the interface

Tech: React, TypeScript

EDUCATION

B.Sc. Computer Science (In Progress)

National Open University of Nigeria

CERTIFICATIONS

Advanced React Developer — Qwasar Silicon Valley

Aug 2026

Completed 7 projects covering modern React development with Next.js, TypeScript, Edge Computing, and AI integration

Introduction to Software Engineering — Qwasar Silicon Valley

Oct 2025

Completed 20 projects covering fundamental concepts of software engineering in C programming

Fullstack Engineering — Qwasar Silicon Valley

Sep 2025

Completed 40 projects covering fullstack engineering programming, including backend, frontend, and database technologies

ADDITIONAL INFORMATION

- Comfortable working in remote and distributed teams, based in Abuja, Nigeria
- Actively learning mobile development, backend scalability, and AI-assisted engineering workflows
- Strong interest in building impactful, user-focused products for retail, hospitality, and other real-world domains
